MEET THE MENTORS

Dr. David Hornbrook *San Diego, CA*

Instagram & Facebook @hornbrookcenterfordentistry hornbrook.com

Dr. Hornbrook graduated from the UCLA School of Dentistry and maintains a private practice in San Diego, California, focused on adult restorative and functional aesthetic dentistry. He has been a pioneer in live-patient aesthetic education and is the past founder and director of LVI, PAC-Live, the HornbrookGroup, and Clinical Mastery. He has been a guest faculty member of the aesthetic programs at SUNY Buffalo, AT Still, UOP, Case Western, Baylor, UT Houston, Roseman, and UCLA. Dr. Hornbrook has actively been involved with the Crown Council and developed the Young Dentist Program where he personally mentors recent dental school graduates through a program he has entitled "Change a Smile, Change a Life" where, along with Utah Valley Dental Lab, donates his time to provide a life-changing smile to someone in need. He is the Clinical Director of Education at Utah Valley Dental Lab and he is a fellow of the AACD and a diplomate of the American Society of Dental Aesthetics. He currently teaches with Dr. Mark Montgomery in both Aesthetic and Functional Occlusion courses. In his private time, he enjoys surfing, off-road motorcycles, snowboarding and spending time with his wife and two sons.

Dr. Mark Montgomery *Salem, OR*

Facebook @amplifieddynamics amplifieddynamics.com

Dr. Mark W. Montgomery is committed to excellent patient care since graduating from Oregon Health Sciences University in 1980. His experience in all aspects of dental care has been enhanced by extensive work in continuing dental education. This background has built a strong commitment to comprehensive health, grounded in beautiful smiles, excellent chewing in function, and a physiology drive wellness focus. Dr. Montgomery has lectured and taught extensively regarding dentomandibular sensorimotor function and dysfunction. He has developed integrated systems to manage pain, headaches, TMD, and force managed occlusion. He is well known for his mastery of skills in the area of clear aligner orthodontics, smile enhancements and veneers, reconstruction and restoration of worn and damaged teeth, removable and fixed/removable prosthetics, and in controlling tooth grinding, airway disorders, pediatric growth and development, dentomandibular sensorimotor dysfunction, and head/face pain.

OCCLUSION DEMYSTIFIED

The Goal

The goal is to offer the aesthetic dentist and ceramic technician enhanced skills for the determination of treatment and occlusal positions for the asymptomatic and the symptomatic patient. Evaluation of the physiological bite position via conventional and high tech methods will be discussed. Occlusion stabilization and equilibrium for candidates of extensive aesthetic treatments will be the major focus.

3 Day Hands On Course

The Ultimate Occlusion Program is a 3-day hands-on weekend. There is no patient treatment, but emphasis is on breakout sessions and focus groups that replicate the clinical experience.

Tuition

\$1,750 per doctor or technician
\$295 per team member
20 CE Credits

You Will Learn

- When and where not to make major and minor pre-treatment and treatment occlusal alterations
- Understanding the science behind tooth contacts and muscle harmony
- Understanding and diagnosing TMJ/Occlusal contact effects
- The clinical implications of muscle findings
- Signs of wear, severe wear, and post treatment triggers
- Accurate facebow records
- When and why facebow transfers are required
- Determination and recording of final tooth and jaw positions based on several occlusal guidance philosophies
- Mounting accurate models
- Determination of physiological bite position, and understanding normal/abnormal movements and muscular/occlusal relationships in healthy and diseased conditions
- Complete examinations and diagnosis in a hands-on clinical exercise utilizing several diagnostic recording and evaluation tools
- Verification techniques for mounting and condylar position
- And much, much more...

FUNCTIONAL AESTHETICS: BEYOND THE BASICS

The Goal

Take your smile designs and makeovers to the next level! Most every one can prepare and cement a veneer, but are you truly designing the smile and the preparation to optimize the definitive result? Is your technique for preparation and cementation designed with a system in mind to optimize efficiency while yielding unbelievable results? Is sensitivity ever a problem or concern? Are veneer provisionals something that you continue to struggle with?

This course has been designed for those doctors who want to fine tune their aesthetic results to an uncompromising level.

6 Day Course

In this 6 day, 2 weekend course, each doctor and their aesthetic team will bring their own patient and provide advanced, hands on treatment of approximately 10 anterior restorations, under the guidance of a clinical instructor.

Tuition

\$5,800 per doctor includes one assistant
\$395 per team member
42 CE credits

You Will Learn

- Advanced smile design
- Advanced soft tissue laser techniques to optimize gingival architecture
- Invisible preparation day pontic design. Advanced preparation design- how to hide open gingival embrasures, controlling the dark tooth, advanced sub gingival preparation to hide dark margins, and much more
- Utilizing a preformation matrix to ensure ideal preparations to yield esthetic, yet conservative, outcomes
- "Tack & Wave" cementation technique: taking the guesswork out of the veneer placement and finishing
- Occlusal concerns: Understanding how to address pathology so that lengthening and rejuvenating a smile can be possible
- Understanding failures- both aesthetic and functional!
- And much, much more!!

ADVANCED AESTHETIC REHABILITATION

The Goal

The goal is to develop mastery level aesthetic dentistry; creating the opportunity to explore vast options of multi-disciplinary care, prosthetic possibilities, and patient management focusing on oral rehabilitation and long term functional success. Following this course, you'll be able to aesthetically treat a complex restorative/prosthetic case and develop a working knowledge of resources to use in diagnosis and case planning. You will learn the latest technique such as bonded ceramics, smile design, and comfortable and stable occlusion that results in the ultimate in beauty and function.

3 Weekend, 9 Day Live Patient Course

In this power packed 3 weekend course, you will treatment plan and treat a full mouth rehabilitation under the guidance of a clinical instructor.

Weekend #1:

Advanced Occlusion and diagnosis and treatment planning requirements

Weekend #2:

Advanced Smile Design and Full Mouth Preparation

Weekend #3:

Advanced Case delivery and Function

Prerequisite: Occlusion Demystified and Functional Aesthetic Courses

Tuition

\$9,995 per doctor includes one assistant
\$595 per team member
60 CE credits

You Will Learn

Diagnosis:

- Diagnosis of the complete masticatory system cranio-mandibular problems, and the complex pain pateint
- Orthopedics: preventing the need for rehabilitation through comprehensive development management
- Determining the correct VDO and how to alter it
- Advanced Smile Design

Case Assessment:

- Records and imaging
- Practical, reliable implant restorations: bridges, crowns, overdentures, fixed removable
- Relationships between the occlusion and the joints
- Myofascial pain and temporomandibular disorders

Logistics In Full Mouth Rehabilitation:

- How to handle the pre-prep and preparation sequencing
- Case finishing and post insertion sequencing
- Alternative therapies for alternative patients (long-term pain management)
- Laboratory support for complex cases

TESTIMONIALS

I had such an amazing experience attending the Functional Aesthetics course by David Hornbrook, Mark Montgomery, and UVDL. I had heard about this course for many years and as a dentist who had already been in practice for several years wondered what I would get out of the course.

I finally decided to sign up for the course. David and Mark are amazing educators, and I thoroughly enjoyed the experience. **I gained so many pearls that have increased my skills ranging from how to talk to the prospective patient, to executing difficult situations. My confidence has soared.**

It is also such an amazing experience to see so many people's lives changed by new amazing smiles. You'll gain a few mentors and many friends from fellow participants as well as develop a relationship with an amazing ceramist to work with going forward. I highly recommend this course to anyone who isn't already the most amazing cosmetic dentist out there.

Dr. Joseph Dastrup, DDS
Davidson, North Carolina

Within the past year I have attended Occlusion Demystified and Functional Aesthetics courses by Drs. David Hornbrook and Mark Montgomery. Both doctors are experts in the field and are able to breakdown complex scenarios into simple, repeatable, practical techniques.

The courses are well organized. Utah Valley Dental Lab provided a high-quality product for my patient. The doctor's guidance doesn't stop with the course; they are both approachable and just an email or text away. **I would highly recommend these courses.**
